the C.I.A. when it decided to hold that unfortu press conference. One is the old and sound that that intelligence organization is best which operates most secretly. A accord factor via the implicit public intrusion this action represented into the prerogatives and duties of the resented into the prerogatives and duties to the state Department in the field of foreign policy. Long-standing suspiciors that the C.I.A. has sometimes tended to overstep its functions into the policy-formation field can only be strengthcoud by this incident. Furthermore, the propaganda purp

The C.I.A. has only compounded its difficulties by its unwise abandonment of intelligence tradition; and it mas reintored the long expressed view of this newspaper that a Congressional "watchdog" committee for the Central Intelli-gence Agency would be a very good thing for the C.I.A. as well as for the country.

The Mayor and the Poor

Mayor Wagner is not an eloquent man, but his address to the City Council this week was a moving one, Seldom have the vicious effects of poverty on the richest city in the world been powerty on the richest city in the word over better illuminated. A quarter of the families in the city live in grinding, abject, hopeless cir-cumstances. They provide most of the grist for the juvenile courts, the family courts, the julis. To the question of how the city can afford To the question at now the city can afford the Mayor's program, Mr. Wagner replies with a retestion question of his own: Now can the city not afford M? That is easier to sak than to answer. But basically the war on poverty must answer. But basically the war on powersy the waged on national lines. The task is beyond the powers of any city. Only the nation as a whole can loope to deal with the tragic waste of human resources that is poverty.

Ethics Now-Not Next Year

March?
There is one simple, logical, necessary reform that could be put, in offect next week, either by statute, by resolution, or by informal voluntary agreement. It is: full written disciouse by every member of the Legislature of any interest—whether as a lawyer working for a client, or otherwise—that might influence or prejudice his votes or lobbying among colleagues measures awasted in genus before the measure. on measures expected to come before the present

seasion.

A glaring example has recently been sired.
Governor Rockefeller declared that Assembly-man John Robert Brook hall been "bought" because he latter, as a lawyer, had taken a 303,000 fee to represent ratiroad unions defending the reatherbedding "full-crew" laws from the carrivers' attack on constitutionality of these laws. Mr. Brook has proclaimed under the pressure, it is not constituted in the pressure, it is not issue of full-crew repeal, will abent himself from debate on it and will not try to himself from debate on it and will not try to

luency other members. But why should Mr. Brook stand alone in this lofty ethical eminence, imposed upon him largely by the Governor's remark? What about other lawyers and their clients whose interests will be involved in upcoming legislation? What about legislators who are directors or officers of banks, and even serve on legislative bankng committees? Or lawyers who represent interests or insurance companies? these members going to excuse themselves on

banking, insurance and liquor legislation?

These outside interests of our lawmakers ought to be on the written record, in advance, ought to se on the writers with corpora-tions, unloss stude associations and the like. The legislators should declare now—next week

Those High-Speed Buses

Motorists on the New Jersey Turnpike since the first of the year have been able to use the left or fast lane in the heavily traveled section between New Brunswick and the northern terminus without the nerve-racking experience of having a huge interstate bus at their rear businers. This is the result of a welco regulation barring commercial vehicles from the left lane.

The eleven bus companies using the Turn The elevin bus companies using the Autoput-have wisely decided not to press their court fight, on the regulation until it has had a thorough trial. If it works well on the busiest section of the Turnipike—as we hope and believe it will—it should be adopted by other high-speed toll roads in the metropolitan area.

Few things are more dismaying to the average Few things are more dismaying to the average motorist than to see in his rear-view mirror a monster bus bearing down on him at high speed. While the bus drivers are skilfful, no one knows how many accidents are caused by penic-stricken drivers seeking to get out of their way. The interstate bus has been a law unto itself too long. It needs policing on the highways, just like the
